

THE EMPRESS EXPRESS

VOLUME XV, No. 22

EMPRESS, ALTA. THURSDAY, Oct. 27, 1927

Price: \$2.00 Per Year

United Church

Church School, 11:00 a.m.
An ounce of prevention is worth a pound of cure. The good influences of religious teaching are important in the lives of the young. There is something attractive about a fitting close to a good day—Sunday evening worship makes an appeal to us all. We should respond.
Public Worship, 7:30 p.m.
Rev. N. W. Whitmore, Minister.

The Tuxis Square held a supper meeting on Tuesday evening—it was even a bigger feed than the Trail Rangers. A set of boxing gloves make great fun for the boys.

Mistress: "How is it Mary, that when you entertain your young man in the kitchen we don't hear a sound?"

Maid: "Well, you see ma'am, he's so bashful that for the present he does nothing but eat."

Holding Annual Sale of Work and Home Cooking

On Wednesday, November 2, the Mayfield Community Club are holding their Annual Sale of Work and Home Cooking, etc. Fish Pond for the kiddies and free dance after sale. Everybody come early in order to buy some of the home cooking for lunch at dance. Eight o'clock sharp.

Thanksgiving

Thanksgiving Sunday, November 6, will mark the first anniversary of the opening of the United Church. Rev. E. T. Scragg, of 5th Ave. Church, Medicine Hat, chairman of Presbytery, will preach at three points, Bindloss, Viewfield and Empress.

On Monday, November 7, Mr. Scragg, will give a lecture of pleasing nature following the turkey dinner to be served by the Ladies' Aid.

Successors To Effects Of Formalin Poisoning

The death occurred of William Buchanan, from formalin poisoning, on Friday, October 21st. The deceased, a few days previous, had gone to the granary for some purpose, and seeing a jug standing outside had taken a good drink out of it, being very thirsty and thinking it contained water. He had swallowed quite a little before he realised it was formalin. He could not be persuaded to go to the hospital at once, and valuable time was lost with fatal results to himself.

Deceased was 63 years of age, and came from New Westminster, B.C., he had been working on the Snowden farm in the Vandine district. He was born in Scotland. He has one relative in this country, a brother who is resident in the States. The funeral took place on Sunday, interment being made in the Empress cemetery. Rev. N. W. Whitmore conducted the services.

Warning should be taken from this fatal mistake of the deceased to see that containers of poisons are properly marked and that they are placed in safe places out of the reach of unsuspecting individuals and of children. Such precautions would apply on the farm or in the home.

To Our Subscribers

We are now placing in the mail a number of accounts for past due subscriptions. With the very splendid crop that has been raised in the district, we trust that subscribers will honor these accounts when they receive their returns from their grain shipments, and accept these reminders in the same kindly spirit as they are sent. While these accounts may not mean much to the individual collector they mean a whole lot to us. There are some among those who were fortunate in getting threshed early who have discharged their obligations to us. We would esteem it a favor if others of our readers will give us like consideration as the opportunity occurs for them to do so. May we ask for your goodwill in this regard.

IMPOUNDMENT NOTICES

Impounded at Pound located on R., W., 24-29 w.7.
One Black Mare, blind feet white, branded R on right leg.
One Grey Gelding, blind left eye, bay 3 over bay V brand right thigh.
J. C. Hagler, Poundkeeper.
Dated, Sunday, October 16, 1927.

Hospital Notes

Mr. Colin MacFadgen, Acadia Valley, who was in the hospital last week with tonsillitis returned home, Sunday.

Master Perry Cox, Estuary, who was admitted to the hospital last Sunday, with an infected finger, returned home yesterday.

Mrs. J. Nagel, Leader, is now in the hospital under medical treatment.

Mrs. L. Fishbush, Estuary, is now in the hospital under surgical treatment.

Miss Beatrice Johnson, Vandyne, is now out of bed and doing well.

Born—To Mr. and Mrs. Gordon Miller, Buffalo, October 20, a daughter.

Mrs. Wilbur Clark, Queens-town, had her tonsils removed last Saturday under local anaesthetic.

Mr. Quong Kwi, local restauranter is now in the hospital under medical treatment.

O. S. A. Opening Date Postponed to November 15

The date of opening for the first and second year students at the Old School of Agriculture has been changed from October 26th to November 15th. This change has been made so that the new buildings may be completed and the equipment installed before the classes begin. The Third Year classes will open as usual in the old building on the 19th of October.

To overcome the loss of time resulting from the late opening, the holidays at Christmas will be curtailed somewhat and the Spring term will be extended a few days.

There are applications from 290 students at the present time. This is one hundred more than at the same date in previous years, and would indicate the attendance at the school this Winter will still be capacity the additional accommodation provided by the new buildings.

I.O.D.E. Card Party and Dance, Empress Theatre, October 31 Admission, \$1 per couple.

BINDLOSS

Public worship will be conducted in the school on Sunday morning at 11 o'clock, Minister's subject, "Things we can't pile on wagons." The boys and girls will be remembered with a story.
N. W. Whitmore, Minister.

Viewfield and Forks United Church Services

For the next two Sundays these two appointments will be combined.
Service at Viewfield at 2:30 p.m.

Everyone is hereby advised of the change and invited to Viewfield on Sunday, November 6. Rev. E. T. Scragg, of Medicine Hat, will be the speaker.

Premier And Party Visiting Northland

Premier Brownlee, Hon. R. G. Reid and a number of prominent citizens are spending the present week which includes visits to many points in the Peace River country. Hugh Allen, M.L.A., for Peace River, is arranging to have a number of delegations meet the Premier at various points to give an opportunity to make any representations they may wish to the Government.

In addition to the Premier and the Provincial Treasurer, the party includes Mrs. Brownlee; Hon. Irene Farley; Miss Brown, Secretary to the Premier; Mayor Bary, of Edmonton; Mayor Osborne of Calgary.

George Tyler's crop is reported as averaging 33 bushels to the acre. Mr. Arnold's at Gorefield tipped the forty mark and has a heavy crop of flax to thresh.

R. J. Nickel has rented the Poor's store building.

DENTIST

Dr. DOWLER

Successor to Dr. Dunbar, is open for business in Empress

Wednesdays, Thursdays and Fridays

Offices: Royal Bank Building (Opposite Hotel)

Eleventh Fortnightly

Govt. Crop Report

Threshing has again been excellent during the past week of excellent weather throughout the Province, according to information received by the Department of Agriculture. Sun and wind have largely remedied the effects of the rains and a good deal of the grain now being threshed is grading "straight." It is estimated that by the end of the present week 35 to 40 per cent of the season's crop will have been threshed and three to four weeks of favorable weather should see threshing completed. Some 6,500 machines are being operated in the Province with an average daily output of over eight million bushels.

Reports from a number of points indicate that threshing returns are exceeding earlier predictions as to yield and the majority of recently threshed wheat is grading No. 2 or No. 3. Good progress is being made with the threshing of oats and barley and very little damage is apparent as a result of weathering.

Bill Crocker is second man at the Lake of the Woods elevator and Harry Stubbington at the Alberta Pacific elevator.

THE New Essex Six

Has all the punch in the world—a smart kick in the back every time the accelerator pedal is set upon. Throughout the whole range, the response to the throttle seems to be practically the same.

It will walk away from the traffic signal faster than anything the Hudson-Essex has ever built. It will step out of line and jump into the lead from any speed without the slightest hesitation.

But further, all this is accomplished without a vestige of that tickle-tinkle business under the hood that Englishmen know as 'pinking' and American engineers as the gas knock, or detonation. Apparently this present Essex just isn't going to 'ping' when the throttle is quickly opened, or when the car is driven hard against a hill.

Under precisely similar conditions most any modern engine will detonate when running on ordinary fuel.

"The Essex motor does what it does on any old fuel at all, it is said, and surely does it on the run of pump fuel that is sold at base price anywhere."

The Conference of Premiers

At the invitation of the Dominion Government there will assemble at Ottawa early in November a conference of representatives of the Federal Government and of all the Provincial Governments at which consideration will be given to the many questions affecting the interests and rights of the Dominion and its several provinces. This conference will be attended by the Dominion Prime Minister and some of his viceregal and by all the Provincial Premiers who in each case will be accompanied by cabinet colleagues.

The object of this round table conference is, of course, to adjust problems common to all and endeavor to find satisfactory solutions, to discuss any differences now existing, to try and harmonize conflicting laws, eliminate overlapping in administration, and, in general, to study the financial requirements of the several provincial units. It is a word, it is co-operation for the good of all Canada. Its importance, therefore, does not call for any special emphasis.

This conference of Canadian Premiers is designed to accomplish for Canada something similar to what the recent Imperial Conference at London accomplished for the Empire as a whole. For example, the exact status of the Dominion and its several provinces in regard to certain subjects requires to be clarified. There is a conflict of authority in matters of currency law, incorporation and regulation, including licensing of companies. Insurance matters particularly there is more or less confusion.

Again, most of the provinces are anxious to exercise strict supervision and control over the sale of stocks and bonds of companies, and several Provincial Legislatures enacted what are termed "blue sky" laws for the protection of the investing public, only to find that all companies had to do to escape Provincial jurisdiction was to become incorporated under Dominion law.

The provinces desire Federal action to overcome this difficulty. Another matter which is causing adverse comment throughout the country is the duplication of police forces, with consequent division of authority, sometimes leading to overlapping and consequent friction. Sometimes resulting in lack of cooperation. In any event, people feel there is an unnecessary waste of the taxpayers' money with Dominion, Provincial and Municipal police. The Premiers' Conference will give consideration to such problems as these.

Then there is the ever-recurring question of the Dominion subsidies paid to the provinces, and the complications resulting from the fact that some provinces have control of their natural resources while others have not. As an outcome of the Dominion Report, the Maritime Provinces have been given a new financial arrangement temporarily. To this the other provinces have not raised any objection, but if a new and permanent arrangement is to be made in the interests of these provinces, then all the provinces have a vital interest in the matter.

Furthermore, it is now fairly well recognized that the financial terms originally fixed at the time of Confederation, and as altered from time to time, were not to the advantage of the Dominion and unfavourable to the provinces. That is to say, increased population brings largely increased revenues to the Dominion through Customs, Excise, and other forms of taxation, but to the provinces increased population means enormously increased expenditures for education, roads, hospitals, court houses, and institutions of various kinds, while the small increase in the subsidies received from Ottawa because of such larger population is a mere bagatelle compared with such expenditures. Re-adjustment of the financial terms, therefore, becomes a necessity from time to time.

No one thing is more apt to weaken Confederation than the existence of a feeling that it is not working out quite fairly to the provinces, or, that, in regard to those matters which are common to both Dominion and Provincial jurisdiction, Federal Departments are not displaying that spirit of helpful co-operation which is essential to complete efficiency in Provincial administration. On the other hand, real unity in effort, frank recognition and understanding of each other's problems, and sympathetic consideration and action will make the Dominion united and strong.

The people of Canada will entertain high hopes that the Ottawa Conference will be as successful in its field as the Imperial Conference was in the larger areas of Empire affairs.

Aviation in Canada

No country provides a better field for air communication than Canada. The distances between the cities are great and the climate is favorable for flying. Experience shows that with suitable equipment, winter presents no insuperable obstacle to the continuous operation of air routes.

Approximately 50 per cent. of the automobiles sold in the United States last year were bought on the deferred payment plan.

Good Country For Aviation

No country provides a better field for air communication than Canada. The distances between the cities are great and the climate is favorable for flying. Experience shows that with suitable equipment, winter presents no insuperable obstacle to the continuous operation of air routes.

The youngest president of the United States was Theodore Roosevelt, who was inaugurated at the age of 42.

Penetrates Far North

University Graduate Prepares For Expedition Into Arctic Circle
Paddling 1,300 miles alone through the regions of Northwest Canada with only Indians, Hudson's Bay Company trappers, and herds of reindeer to punctuate the monotony, Cornelius Osgood, 21-year-old graduate student of the University of Chicago, spent the summer of 1916 in the North and is now preparing himself for a 14-month expedition next year into the Arctic Circle to report on the culture of the little-known Athabaskan Indians. Osgood has just returned to the university to continue his studies in ethnology.

One Drop of "Putnam's"
—Corns Stop Aching

Isn't it wonderful — Just a drop or two of Putnam's on any sore corn and out comes all the pain. After a few applications the corn is gone and the foot is comfortable. No scar, no pain, no itching. The lightest and most effective corn cure on the market. Putnam's is the best.

Will Bar Italians

Fascist Oath Will Bar Aliens From U.S. Citizenship

Secretary of Labor Davis has received his statement that acceptance of the Fascist oath, as explained to his office, should bar an alien from citizenship in the United States. "If the Fascist oath requires double allegiance, in my opinion the man or woman who takes it will not make a true American citizen," the secretary declared.

The question of eligibility of a member of the Italian Fascist movement to citizenship came up at the time, where J. R. Thomas, naturalization examiner, is reported as expressing action on 23 Italian, pending investigation of the so-called "blood" oath.

BABY'S OWN TABLETS
ALWAYS IN THE HOME

One mother has used Baby's Own Tablets for her little ones she always keeps a supply on hand, for the first trial convinces her there is nothing to equal them in keeping children well. The Tablets are a mild but thorough laxative with sweetening, thus driving out constipation and keeping the bowels cool and simple forever, and making feeding easier. Concerning them, Mrs. Schlotte writes: "I have used Baby's Own Tablets for the past two years and an never without them in the house. They have always given me the greatest satisfaction and I can truly recommend them to all mothers of small children. The Tablets are sold by medicine dealers or direct by mail at 50 cents a box of 24 and by Williams' Medicine Co., Brockville, Ont."

America's Oldest Shoemaker

The oldest shoemaker still at the last in the United States is believed to be Daniel Slingerland, of Poughkeepsie, New York, who has celebrated his 84th birthday. Slingerland entered his father's shoe repair shop when he was 13 years old. He inherited the business and it is calculated that he has handled 10,000 pairs of shoes.

Externally or Internally, It is Good. When applied externally by brisk rubbing, Dr. Thomas' Electric Oil opens the pores and penetrates the tissue, touching the seat of the trouble and immediately affording relief. Administered internally, it will allay the irritation in the throat which induces coughing and will relieve affections of the bronchial tubes and respiratory organs. Try it and be convinced.

Antarctic Expedition

Expedition To Extreme Southern Seas Returns To England

After two years of scientific research in the extreme southern seas, Captain Robert F. Scott's old Antarctic ship, Discovery, returned to Falmouth, England, having suffered no casualties in the struggles with the ice fields.

The expedition gathered valuable information, especially about the life habits of whale. Dr. Stanley Kemp, the leading scientist aboard, told newspapermen that on the disputed coastal habit of whales, they are not monogamous. On the contrary, he declared, they have, so to speak, "a wife in every port."

The heaviest wolf is the man-eater, which runs from 75 to 85 pounds a cub. It is a close second, with from 60 to 85 pounds; brownish in color, running from 50 to 75 pounds a cub foot.

Isolate Germ Of Infantile Paralysis

Task Of Science Is Simplified In Attempt To Cope With Disease

A special despatch to the Morning World from Boston, Mass., New York, says:

"The germ of infantile paralysis has been definitely classified, thereby simplifying the task of science in its attempts to overcome the disease," Dr. W. L. Aycock, head of the Harvard infantile Paralysis Commission, said recently.

"The main problem now is to find a suitable animal to yield an auto-toxin."

"The only animal which takes the disease appears to be the monkey," said Dr. Aycock, "and the latter's mortality is so high that it is an unsatisfactory subject. When the proper animal for serum purposes is located, infantile paralysis will be brought under control."

Dr. Aycock pointed out that a somewhat similar problem confronted science when the diphtheria germ was first isolated. It took nearly a year before diphtheria serum could be made from the blood of the horse.

The infantile paralysis germ is too small to be detected even by the most powerful microscope, Dr. Aycock said, "but its presence was proved by evidence of growth. He denied that an infantile paralysis epidemic existed. He pointed out that in Massachusetts there has been one-fourth the number of cases reported this year as compared to 1916.

"Parents need not worry," he said. "Fatalities from automobile accidents are far greater than the number caused by this disease. Many children who have once had the disease will not have it again."

Girl On the Magazine Cover

Matter, Is Discussed At a Meeting Held in Toronto

"They tell us that women are afraid of the 'pretty girl' covers but that the most important women are the ones in the magazines," said Mrs. H. M. Allen in discussing magazines at the Toronto Exhibition.

"They are more cautious than 'dread' said a woman old in front of the 'pretty girl' covers but that the most important women are the ones in the magazines," said Mrs. H. M. Allen in discussing magazines at the Toronto Exhibition.

"They are more cautious than 'dread' said a woman old in front of the 'pretty girl' covers but that the most important women are the ones in the magazines," said Mrs. H. M. Allen in discussing magazines at the Toronto Exhibition.

Umbrella Makers Benefit

Trade Is Boosted By Wet Weather in France

Amid all the complaining about poor business that has gone on in France this year, one class of men have been singularly prosperous. They are those who make and sell umbrellas. Never, they say, has business been so booming. In what it still or accidentally known as summer time.

This year, from a climatic standpoint, France had almost everything at all. May was fine, but May is spring. After that it began to rain — and it kept raining all through June, July and August.

Being unusually in demand, the umbrellas went up in price. Even an inexpensive one cost five dollars or more.

While catching themselves, the umbrella men kept the state of mind of the public. They had printed and distributed 1,200 lithographs of General Delamare, the French weather man.

Losses From Smut
Smut diseases cause heavy losses wherever cereal crops are grown. In Canada, careful estimates of smut losses are available only for the last few years, and these show the average annual loss to the Canadian farmer is about 10 per cent. of the crop.

From this source as over \$12,000,000. Government departments, agricultural colleges, and technical authorities are all engaged in the effort to reduce this loss.

Minard's Liniment for Asthma.

Flight Will Be Hazardous

More Dangerous Than Any Yet Attempted

Commander Byrd's Trip To Antarctic

Commander Richard Byrd, who recently flew the Atlantic ocean with passengers, will undertake the most hazardous flight that has ever been made by an airman when he will attempt to reach the South Pole by airplane. He has already crossed the North Pole by air, but the task he has now set out to accomplish entails even greater dangers and difficulties.

For instance, he may find himself obliged to winter in the Antarctic in the event of being caught in the ice. But if all goes well, and as now planned, the flight will have been accomplished and the fatigued voyagers on their way back to civilization early in 1928.

"If all goes well,"... These words are often on the lips of Byrd and his companions just now, for well they know, from all the data to hand, that usually all does not go well on that vast but little explored waste, which has been so vividly named "The Home of the Blizzard."

The first airplane to fly across this unknown huge vastness of the earth's surface will be equipped with a powerful wireless set, and with little aerials that can be flown high in the air to give greater power, so that in the event of a forced landing, or in the event of an emergency, the crew will be able to communicate with the companions left at the base camp at Ross Bay. They will have the means ready to effect Commander Byrd's rescue.

Diarrhoea
Summer Complaint
HE ALWAYS USES

Dr. J. C. McCreary, McCreary, Ala., writes: "Over forty years ago my mother used to give me Dr. J. C. McCreary's Wild Strawberry Diarrhoea Remedy. I have used it ever since and it has always been successful. I have been accustomed to take a few doses of this remedy, reliable remedy and always seems to have the desired effect, so I cannot but use it."

Don't Accept a Substitute
This valuable preparation has been on the market for the past 30 years; put only by The T. M. M. Co., Ltd., Toronto, Ont.

May Secure Place On Olympic Team

Girl Would Win in High Jump

Toronto Coach Predicts Saskatoon Girl Would Win in High Jump. That Ethel Chisholm, brilliant high jumper of Saskatoon, will secure a place on the Canadian Olympic team to compete at Amsterdam next year, is the opinion of Walter Knorr, one of the best known track and field men in the Dominion. He is now coach of the schoolboys for the Ontario Athletic Commission. Walter Knorr claims that Ethel will be a sure winner in the high jump, and that with a little more practice, will be a factor in throwing the discus and javelin. He claims that Rosa Crosson of Toronto is the fastest female sprinter in the world and that Fanny Rossenfeldt is the best all-round girl athlete.

Holloway's Corn Remover takes the corn out by the roots. Try it and prove it.

Fresh water can be dipped from the Atlantic Ocean for a distance of 50 or more miles off the coast of Brazil. This is due to the enormous amount of water that pours from the mouth of the Amazon.

Relieves Sore Throat—Minard's Liniment.

German Embassy Aids British War Veteran

Provides Suitable Accommodation Free

To London. Prominent Artist. A pavement artist, whose chief claim to patronage is that he has been blown up by a buried German shell at Vimy Ridge in 1917, has been allowed the free use of a basement room in the German Embassy at London as a studio—a proof that the war is really over.

William John Stubbs, the artist, also resides in the patronage of some of the most distinguished men in Britain, including Premier Baldwin, Lord Londsdale, Sir William Joynson-Hicks and Ramsay MacDonald.

He has been granted a lease on a country cottage by a high official of the British Foreign Office, and last year was treated to a holiday in France by the same benefactor, "which proves," he said with a smile, "that true art never lacks patronage."

Lawyer—"Why did you kill this man?" Prisoner—"The gun went off accidentally. I took him for some one else! It was self-defence! I was crazy! And besides, I didn't kill him!"

"Now that you are married I suppose you will take out an insurance policy?" "Oh no! I don't think she's going to be dangerous!"

The Man With Asthma, almost long for death to end his suffering. He has seen thirty years of endless torment with intervals of rest which were never long enough to prevent the coming of the next attack. Let him turn to Dr. J. C. McCreary's Asthma Remedy and know what complete relief it can give him. But use it judiciously and he will find his asthma a thing of the past.

The Life-time of a good watch, experts say, is 50 years. The balance and hair-spring vibrate 157,000,000 times a year, while an equal number of ticks come from the escapement.

Air Mail Service For Canada Is Being Seriously Considered

Vancouver.—Although air mail service for Canada is not a possibility of the immediate future, it is being seriously considered, Hon. P. J. Vondt, postmaster-general, said here today.

While the post office department had not made any definite plans it has been studying the situation for some time, he said. He referred to the present service for trans-Atlantic mail from Father Point to Montreal, and he said reports of the Royal Canadian Air Force, under whose supervision the service was being conducted, showed that it had been highly successful. From these reports the post office department will be guided, he said. Inauguration of a service across Canada might possibly be considered by the civil branch of the Royal Canadian Air Force.

With the extension of commercial aviation it might be possible that the work would be done under contract by private companies.

In any event, Mr. Vondt said, the increasing interest in aviation would result in organization of commercial companies to handle freight mail, when this condition arose the department would consider what steps it should take.

Bank Robbery Frustrated

Prestige of Mind Of Calgary Bank Manager Fails Bandits
Calgary.—Three bandits who attempted to hold up the Hillbank branch of the Royal Bank of Canada here were frustrated through the presence of mind of the bank manager, the bank said. He heard the command "put them up" and turned to look down the barrel of a revolver held by one of the bandits who were then away, across a counter.

Mr. Dringler threw up his hands at the same instant, jumping sideways into his office where he ran by in his desk. He grasped this and began to shoot at the shadows of the men through the frosted glass partition. He shot four times and the two clerks, who by this time had been able to seize their guns also opened fire on the retreating bandits. In all seven shots were fired.

May Not Attend Parley

Uncertain Whether Premier King Will Go To Continental Congress
Ottawa.—Considerable uncertainty exists as to the likelihood of Premier W. L. Mackenzie King accepting an invitation to attend the continental meeting of the sitting of the Continental Congress in York, Pa.

While the prime minister is at present out of the country, it is reported that on his return he will be busy engaged in preparations for the conference of provincial premiers to be held here early in November. No decision has yet been reached by Hon. William Phillips, United States Minister to Canada, as to whether he will attend the continental.

B.C. Exhibit For Winter Fair

Victoria.—Preparations are almost complete for British Columbia's exhibit at the Toronto winter fair in November. The government is assembling a large display representative of agriculture generally to give some idea of the progress in farming in the province. Mr. David Warner, deputy minister of agriculture, will attend the fair, representing the department.

Would Restrict Sunday Trade

London.—Several large organizations in the retail trade are promoting a bill to be submitted to Parliament calling for the restriction of Sunday shopping which, in the past few years, has grown enormously, particularly in London.

Communist Party Is Reported To Be Crossing Ground In Great Britain

London.—Some interesting figures have been furnished by the central executive committee of the British Communist Party in connection with the annual conference which will be held shortly.

It is stated in the committee's report that a membership of more than 10,000 was registered last year when the country was affected by the strike of the coal miners and the general strike in connection therewith, but

South Africa Will Erect Mooring Mast

Wish To Contribute To Inter-Imperial Airship Service
Durban, South Africa.—The Heriot-Watt Government has concluded an agreement with the Imperial Airways Limited, London, for the erection of a mooring mast at Tongaat, Natal, 20 miles from Durban. A huge aerodrome will be established at Tongaat.

In connection with the projected mooring mast, it was reported some months ago that it had been agreed with the Imperial Airways Limited, London, for the erection of a mooring mast at Tongaat, Natal, 20 miles from Durban. A huge aerodrome will be established at Tongaat.

It is understood that the Government committed itself to construction of a mooring mast in connection with the South African Union to the inter-imperial airship service.

Plan Subways For Montreal

Huge Project Would Provide Subway Lines and Abolish Level Crossings
Montreal.—Initial steps have been taken, it was officially announced, by a group of local interests connected with financial houses in New York to enter into a \$200,000,000 project with the city, province, Federal Government and railway companies to abolish level crossings in Montreal, construct a grand central terminal station and construct underground train lines.

The work in view comprises, it was stated, the abolition of all level crossings and in entering the city either by elevating them or putting them underground. The proposition which it is stated is being made to elicit, provide additional governments, beside the railway heads, would provide for collaboration of all these bodies in the financial arrangements.

Russia Planning To Buy Montana Horses

Increased Price In Western Canada Too High Is Report
Quebec.—Canada's second contingent of horses to Soviet Russia is now on the high seas, the Quebec steamer Donabask having left Quebec with 1,100 animals for Leningrad.

Captain Sturrock, in charge of the ship, said before leaving that Russia is looking towards the state of Montana to supply her with horses due to the action of Western Canadian farmers in raising the price of such animals to \$30 each. Montana and other states are willing to supply the horses at \$12 per head, he said.

The "hulks" will be back here early in November for her third and last trip of the season.

Engine Chen Married

Reported Marriage In Moscow Of Former Nationalist Foreign Minister Of China
London.—The God of Love seems once more to have won out over the God of War in the Chinese Nationalist movement.

The Rian correspondent of the Daily Mail quotes an official Soviet despatch to the effect that Eugene Chen, former Nationalist Foreign Minister, and Mme. Sun Yat Sen, widow of the father of the Nationalist movement, were married in Moscow.

The newspaper reports the couple's intention to spend their honeymoon in China by starting a new revolution, and adds that the Third Communist International is financing the activities of the bride couple.

Communist Party Is Reported To Be Crossing Ground In Great Britain

London.—Some interesting figures have been furnished by the central executive committee of the British Communist Party in connection with the annual conference which will be held shortly.

It is stated in the committee's report that a membership of more than 10,000 was registered last year when the country was affected by the strike of the coal miners and the general strike in connection therewith, but

Young Orator

Frederick Hinton of Tavistock, Ont., Canada's champion orator who has just reached home after his prize win in the Canadian oratorical contest. He visited Scotland, England, Belgium, Switzerland and France. He will compete on October 11 in the international oratory contest at Washington.

Aviators Safe After Long Desert Flight

German Plane Delayed By Detour Ordered By Turkey
Bagdad, Iraq.—Lieut. Otto Koenneke, pilot of the Germania, whose arrival here cleared up the mystery of his whereabouts since his take-off from Angora, Turkey, said that his delay in reaching this place had been the chief cause of the instructions given him by the Turkish authorities on leaving Angora as the route to be followed.

The German aviator, who is en route to the U.S. by way of the Orient, said that the instructions involved a wide detour, the Turkish idea being apparently to prevent foreign aviators from flying over certain areas of Turkish territory.

The aviator said that he had left at Aleppo and then had deferred his departure for Bagdad in order to avoid flying in the hottest part of the day.

Would Make Britain Dry

Evangeline Booth Convinced That Prohibition Is Possible In England
London.—Commander Evangeline Booth of the Salvation Army, to whom a welcoming reception was given in his London hotel, he conveyed that prohibition is a big possibility for England.

"If I were over here and had the help of Lady Astor, we could have prohibition in England in no time," she is quoted as saying in an interview.

The Commander, who is making her first visit here since 1920, talked strongly on the benefits which she said prohibition had brought to the United States. "I would say to every country, if you want to be rich in every way, you must have prohibition and banish drunkenness and inefficiency."

Preparing Customs Report

Ottawa.—Three more weeks will be required to complete the report which the Royal Commission on Customs will present to the Governor-in-Council.

The three commissioners are hard at work on the report, which will, it is expected, be voluminous.

Doctor Made Indian Chief

Another Englishman has left Canada with a mission to the Indian tribes of the Western plains. The title of "Chief Bear Head" was conferred upon Dr. Edward Brown, of the Poultry World, London, England, by Chief Running, Ontario of the Sarco Tribe.

The ceremony took place on the Sarco Ranch near Calgary, recently during the Canadian Pacific Western tour of the World's Parliament Congress delegates of which party Dr. Brown was an outstanding member.

The photograph shows Dr. Brown shaking hands with Chief Running. Antelope after he was accepted as a member of the Sarco Tribe.

Gypsy Children Ask For Separate School

Pupils In Czechoslovakia Fear Those Of Other Tribes
Prague.—School children in the town of Hornonova, Czechoslovakia, have struck for separate schools because of their instinctive fear that the scarlet-jawed nomads beside whom they sit have cannibalistic instincts.

Striking children have been strongly supported by their parents, who declare their children are in danger of being eaten. Besides the force of their arguments, the authorities have decided to build a separate school for Gypsy children, which, it is believed, would be the only one of its kind in the world.

The present protest grew out of alleged cannibalistic orgies for which 25 gypsies are now awaiting trial. They are said to have confessed to murdering and devouring scores of persons, including the Jews, but they could not afford to buy ordinary meat, but that they did not see "anything wrong in eating human flesh."

Will Study Canada's Methods

Imperial Conference To Investigate Forest Pest By Air
London.—Taking a lesson from Canada's scheme of surveying forests from the air in order to destroy pests, the Imperial Conference, which meets in London, will consider the best means of carrying on a crusade against pests throughout the Empire.

Thirty dominions and colonies will be represented at the conference. It is estimated that fully twenty per cent. of all the Empire's crops, especially in the tropics, are lost annually through the ravages of insects. The conference hopes to establish research houses in many of the dominions and colonies, with the object of making war on all sorts of pests in this connection, a special study will be made of what has already been accomplished in Canada.

Completes Long Trip

British Aviator Makes Record For Long Distance Solo Flight
Capetown, South Africa.—Lieut. H. H. Bentley, instructor for the South African Air Force, who left London, England, on September 1, in a light moth airplane for Capetown, completed his long solo flight of more than 7,000 miles.

Lieut. Bentley, who made the trip in long hops to prove the feasibility of London-Capetown air communication, and to demonstrate the capabilities of a light plane on long distance flights, created what was said here to be a world's record for a solo long-distance solo flight.

The aviator, who had hoped to make the trip in 19 days, found 28 necessary for the long trip, some of it over hazardous and deserted country.

Paralysis In Sweden

Stockholm.—The infantile paralysis outbreak in various parts of Europe has reached Sweden, cases having been reported from two provincial districts. At Marma, a military training field north of Stockholm, a young conscript died from the disease, and in the neighborhood of Orebro, west of the capital, several children are ill, but none fatally thus far.

G.P.R. Earnings

Montreal.—The earnings of the Canadian Pacific Railway for the year ended August 31, 1927, were \$25,258,634, an increase of \$25,460 over the gross earnings for the same time in 1926.

The working expenses for the corresponding period, however, showed an increase of \$1,671,687, representing a decrease of \$142,227 in the net profit, compared with August 1926. Net profit for August 1927 was \$23,586,947.

Heavy Loss Of Life And Property Damage As Tornado Hits St. Louis

St. Louis, Mo.—Sixty-nine persons were known to have been killed, 275 injured and property damage conservatively estimated by the Globe-Democrat at \$75,000,000 was caused by a tornado which devastated an area of six square miles here.

The fatality list was expected to increase with the death of three usually injured and the discovery of other bodies. The total number of injured was estimated at 1,900, as hundreds received treatment by private physicians and had no report to hospitals or police.

The Globe-Democrat estimated 5,000 or more buildings, residences and business houses were demolished or damaged.

Striking the beautiful west end of the city, the tornado came out of the southwestern sky. The twister reached a velocity of 90 miles an hour in a few seconds and subsided as many minutes later to be followed shortly by brilliant sun shining through the windows of clouds.

Death Of Newspaper Man

W. J. Wilkinson, Of Toronto, Was Victim Of Tornado
Toronto.—The death occurred at his home here of W. J. Wilkinson, news editor of The Mail and Empire, who died of a heart attack. Mr. Wilkinson's health had not been of the best, he was daily at his post in the newspaper office and therefore his death was a shock to his colleagues and friends.

For more than 10 years he has been an outstanding member of the Toronto working newspaper force and prior to that was employed on newspapers in St. Thomas, Ont. He was about 79 years of age.

Transportation Problems Of Canada Very Wide And Very Complex

Australia's Tariff On Automobiles Raised

Canadian Manufacturers Will Suffer Under New Ruling
Sydney, Australia.—The new Australian tariff, effective immediately, will have its effect on the Canadian automobile export trade with Australia, which during the past two years has averaged \$2,000,000 in value.

Canada comes under the intermediate tariff in Australia. Hitherto the duty charged by Australia on an assembled motor chassis from Canada has been 14 per cent.; this under the amended schedule will be increased to 15 per cent. The former rate of 12 per cent. on assembled chassis is raised to 20 per cent.

The new tariff in the case of the United States, will be increased from 12½ to 17½ per cent. in the case of unassembled chassis, and from 17½ to 25 per cent. in the case of American made assembled chassis. English made assembled chassis will be admitted to Australia free of duty, while the import of 1 per cent. is put on assembled English chassis.

The minister of customs said he thought the new tariff might cause a shift from United States to Britain and cause a stimulus to inter-imperial economic development.

Praises Canada's Judicial System

Method Far Superior To U.S. Says New York Official
Toronto.—Canada, in its administration of justice, is way ahead of the United States, stated William Lewis Butcher, chairman of the executive committee of the Big Brotherhood and Sisterhood Federation and also a member of the New York State Crime Commission, in an interview here.

"The country spends too much money on jails, penal institutions, and the like," said Mr. Butcher. "Further expenditures will be necessary for some time because proper care has not been laid on the preventive side."

Had To Acquire Asset
New York.—Lady Patricia Russell, who was away from home as a girl of 17, to become a maid in an English butler's house, said she might study characters and acquire a ready eye for stage work, as is New York, to appear before the footlights, under the name of Patricia Barry.

Lady Russell is a grand daughter of the late Marquis of Dufferin, once Governor-General of Canada.

Progress In Agricultural Methods Shown By The Adoption Of Labor-Saving Machinery

The outstanding trait of Western Canadian agriculture is its ceaseless progression. Western Canadian farming never stands still, but is constantly featuring new developments. The diversity of crops extends; methods of operation are steadily being improved. In particular, the advance in the adoption of mechanical devices and the practical utilization of machines to facilitate farming operations and reduce manual effort has been striking. Today, the profession of farming in Western Canada demands not so much physical strength as a working mechanical knowledge. Many labor requirements are steadily being reduced to a minimum and the Western Canadian farmer is becoming more and more the operator of a machine.

According to report from intelligent observers in Western Canada, the spring reveals many very definite trends in the agricultural industry of that territory, one being the greater powerizing of the large dry land farms and the other a marked increase in the favor and probable utilization of the combined harrow-drawers. Dealers in the territory report an unprecedent demand for the light farm tractor and a tremendous increase in orders for combines. Tractors have been steadily delivered at farms as they were received from the factory, while, according to one estimate, the number of combines used in Alberta and Saskatchewan this fall would be close to one thousand machines as compared with 175 in one last year.

Though combines were tried out in Western Canada as early as 1922, the year 1925 saw the first general practical test of its representative in the territory, and the voluminous demand for the machines this year would show a wide argument as to their practicability in the area, which leads authorities to anticipate some form of a reputation of Kansas history in this respect. The general adoption of this machine would probably be the most revolutionary factor ever introduced into Canadian agriculture. It eliminated the necessity of handing, tying, and stacking, and throws the grain as it goes along its possible effect on the yield from the fact that at harvest time the Canadian West finds it necessary to import about 15,000 additional workers, and the number of men rises with the increase in cultivation.

As one of the world's leading agricultural countries, Canadian methods are extensively adopted and the product of implement manufacturing industry finds its way into nearly every farming country of the world. The business may be expected to extend to the reaper-harrows in certain all provinces and further to the west. The value of farm implements exported from Canada in the last fiscal year reached \$17,129,497, as compared with \$13,627,000 in 1924, and \$13,312,712 in 1924-25, and \$8,978,752 in 1926.

Could Use X-Ray

When police at Birmingham, Ala., descended upon a group of negroes closely grouped around a blanket upon which lay many bills, they thought they were breaking up a dice game. But there were no dice. They searched the men and the bills, but found nothing with which gambling might be done. The cures were thrown out of court when the defense attorney demanded that the dice be produced. Afterward a grinning negro approached the lawyer and said: "I swallowed 'em then. We all gets little ones that's easy to swallow."

Saving The Elk

Reports from the Department of the Interior show that the elk, recently almost extinct in Canada, has now increased to about 26,000, through the protective measures framed by the government. The animals are distributed about as follows: Manitoba, 4,000; Saskatchewan, 5,000; Alberta, 4,000, and British Columbia from 6,000 to 7,000. About 2,000 of these elk are to be found in the national parks.

New Bridge Street, London, was recently paved with rubber blocks. After six months of wear, it is said to be in almost perfect condition. The street is located in the heart of London's busiest section.

Auto salesmen in the state of Washington are forbidden to refer to the speed of their automobiles in advertisements. This law has been passed with the hope it would decrease reckless driving.

W. N. W. 1701

English Is Common

Speech Of Millions Taught To School Children Of Almost Every Civilized Country

At a recent meeting of the Royal Society of Literature, attended by prominent literary men of Great Britain and the United States, the use and misuse of certain English words and national differences of pronunciation were discussed. One outcome was the decision to take steps to form an "international Council for English." This council would consist of fifty British members and fifty members from the United States. It would investigate disputed usages of words and study "Americanisms and Anglicisms."

The proposal that an international council for English be formed drew attention once again to the spread of the use of that tongue throughout the world. The various dialects of Chinese are spoken, heard by more people than in English. On the other hand the written language of the Chinese is so difficult to master that learned men in that country have been striving to simplify it. Spanish is the tongue of an increasing population in South American states. In the United States, English has been carried by settlers to North America, Australia and Africa, has become the language of a world-wide commerce. In 1901, according to a British statistical English was spoken by only twenty-one millions of people. By 1930 it was the native tongue of one hundred and eleven millions. Today it is the common speech of one hundred and seventy millions. It will be spoken by more and more people as the populations of the British Empire and of the United States increase. Furthermore, it is being taught to children in the schools of almost every civilized country. It is growing more and more into use as an international language.

Developing New Grain

"Mystery Wheat" Ripens Fortnight Earlier and Yields Equals Marquis

In his first statement on his "mystery wheat," which he is developing on his farm near Wembley, Alberta, Herman Treile, wheat and oat raiser, reveals the new grain is better especially developed for harvesting by combines. These are features of mystery wheat. The straw stands stiff even under light snow; the head does not shatter; it retains the kernels in the spikes; even under adverse weather conditions.

The grain ripens a fortnight earlier, enabling it to stand in the field with dead ripe, without damage from frosts, thus providing ideal grain for simultaneous cutting and threshing. The yield and quality equals that of the Marquis variety.

Treile is still developing the new wheat but hopes by the end of next season to have it accepted officially so that farmers all over the West may start growing it.

Progressive Canadian Eskimos

Rapidly Adopting The Ways Of Civilized Life

Canadian Eskimos are progressive people. The more advanced have, in their homes, sewing machines, gramophones and radio sets. In the Athabasca delta and along the Arctic coast the ambition of the Eskimo of the family is to own a schooner fitted with an auxiliary gasoline engine and the high price of Arctic furs has enabled a good many to attain this objective. At Akavik, a trading village on the coast, a trading vessel, and police post on one of the islands of the delta, as many as twenty-five of these schooners, all owned by natives are frequently to be seen at one time.

Prairie Provinces Are Making More Butter

Account For About Thirty Per Cent. Of Canada's Output

Every one of the provinces records an increase in butter production last year, Manitoba having the largest proportionate increase. A striking feature of the survey, in fact, is the position in butter production which the Prairie Provinces have come to occupy. These provinces, Alberta, Saskatchewan and Manitoba, which a comparatively short while ago did not provide even for their own requirements, now rank third, fourth and fifth, respectively, and together account for nearly 30 per cent. of the Dominion butter output.

The Boas: "Is it true that you leave your typewriter and go when the clock strikes five, even if you are in the middle of a word?"
The Scribe: "Certainly not! When it gets as near five as that I never begin a word at all."

Free church seats might be appreciated more by their less numerous, forlorn.

American Legionnaires to France

Sixty members of the "Boys of '76" Bugle and Drum Corps of Post 76, Racine, Wisconsin, part of the American Legion, who sailed from Quebec recently to attend the national convention in Paris. Attired in white uniforms and steel helmets, and accompanied by brilliantly garbed drum corps, they presented a fine and some spectacle as they assembled to embark on the Canadian Pacific steamer ship Montreal for Antwerp.

Given Enthusiastic Reception

Traffic Halted When American Legion Delegates Marched in London

The people of London gave a wide and enthusiastic reception to a delegation of nearly 1,500 American Legion members from New York who marched through the streets creating a big traffic problem.

The Americans, in bright uniforms and bearing flags "roll in" in the Great Scotland Yard, while a crowd of nearly 1,500 people, many of whom became more than a crowd, holding up the Whitehall traffic. Then the visitors, in their costumes in an impressive column, made resplendent by red, white, and blue ribbons, British and American flags, and the marchers' bright uniforms. A drum major of imposing proportions and gorgeous in scarlet, blue and gold, led the legion band. A woman's contingent headed the marchers, bearing twelve American flags.

After placing a wreath on the cenotaph, the American veterans visited the tomb of the unknown soldier in Westminster Abbey.

Sacrifice Of Human Life

Safety Measures Necessary To Lessen Number Of Automobile Accidents

It was freely admitted at the opening session of the 11th annual convention of the Good Roads Association of Canada at Niagara Falls recently, that in the past few years there had been an appalling increase in the number of human life due to the automobile, and this in mind Hon. George H. Henry, Ontario minister of highways, appealed to the gathering to make "safety first" the keynote of the convention.

H. S. Carpenter, deputy minister of highways in the province of Saskatchewan, stressing the fact that development of roads had followed that the province generally, said there were now some 7,500 miles of roadways in Saskatchewan—supplying some 450 motor points, as compared with 400 in the neighboring provinces. The speaker extended an invitation to the Good Roads Association to hold their next annual meeting in Saskatchewan.

Saskatchewan Wheat

Produces Sufficient Wheat To Feed Thirty Million People

Saskatchewan produces more wheat than all the other provinces of Canada combined, enough to feed 30,000,000 people, and is exporting twenty-five tenths of the production, said Premier Giesbrecht in a speech, addressing the Pacific Foreign Trade Council in Victoria, B.C. The wheat production of the whole was 100,000,000 tons, 30,000,000 tons of which was for export. Of this latter figure Canada produces 7,000,000 tons, of which 5,000,000 tons is under the control of the wheat pool of Western Canada.

Prospective Buyer—"How does the land lie out here?"
Suburbanite—"It isn't the land. It's the agents."

Honey Competition

At Agricultural Fair

First Time Classes In This Product Have Been Arranged
Beekeeping has been an important industry in Ontario for many years, but since the war it has made unusually rapid strides in the western provinces. Recognition of the importance of honey production, as a national industry, being given this year by the Royal Agricultural Society at Toronto, where for the first time competitive classes in honey have been arranged. At the "Royal" in past years there have been displays of honey, but no competition. All the visual exhibits made from the 1927 crop of the exhibitor's own apiary, or if exhibited by an association or province, must be produced by an apiary within that province in 1927. In order to ensure that the displays will reflect the utmost credit on the beekeeping industry, the judges will have the right to disqualify any entries that are not attractively presented, without considering the quality of the honey.

Canadian honey has already won an enviable reputation overseas, the Ontario entries having taken top place at the Imperial Dairy Show in London for several successive years.

Watch 10 Years Old
Miss Cynthia A. Pinter, White Lake, N.Y., has had her grandfather's watch made for the first time in 100 years. The watch, which was made in London in 1717, belonged to Peter Pinter, and becoming out of order, she had it repaired by a watchmaker in London and deposited it in a bank.

New Fields Left To Conquer As Out-of-the-Way Parts Of The Earth Are Mapped By Explorers

Profit In Sheep

Sheep Raising As A Side Line On The Prairies

Although the farmers of the prairie provinces will probably continue indefinitely to depend upon grain growing as their main source of revenue there are several lines of work which fit in admirably with grain growing and provide an extra source of income. One of the best of these is the raising of sheep for the prairies, especially in the Red River, Saskatchewan, and Alberta. Many farmers are realizing this and the number of sheep in the three provinces is increasing. They are particularly happy to have come when the main crop is found wanting on account of seasonal conditions. The two sources of revenue, grain and sheep, are mutually exclusive. The proportion doubly attractive.

Sheep are useful as a channel for marketing low grade wool and grain for cleaning stubble fields. They appreciate a varied ration, however, and districts where alfalfa is available is plentiful these should be used as roughage for the breeding stock in conjunction with grain, but good results have been attained at Scott when oat straw was the only roughage fed. Probably the most satisfactory method of getting the most from sheep is to purchase a few ewes and use purebred rams. If the farmer has had no experience with sheep he should start with a small number.

Vegetables and Meat

No Proof That One Is Better Food Than The Other

Speaking of longevity and its causes recalls the fact that recently in a community in Ontario, a farm boy—youth—men—use a meat eater and the other a vegetarian agreed to stake their contentions upon a few months' trial. The vegetarian lost, but by so small a margin that the meat eater's victory hardly counted for much in his protestations that meat was standard victuals for the poor. Both runners finished in fine condition, so that it would seem as if the meat eater's victory was his meat as well. The point of the whole matter, so far as those who have trouble with stomachs are concerned, is that if one likes vegetables he should eat them and lots of them, whereas he who likes meat and finds that it does him good, he should be free to eat it. It is simply because there are those who protest that vegetarians live longer and are healthier. It would have been interesting to know how a runner was able both meat and vegetables would have finished. Both vegetarians and consumers of meat only should occasionally give their stomachs a rest. It is particularly selfish and nothing more that makes one eat meat that everyone else looks appetizing must be indigestible.

English Insects Recruited

New Zealand Has Appealed For Aid To Control Weevil Menace

An appeal for the southern islands of New Zealand has been made to New Zealand. The Dominion has appealed for aid against the gooseberry and blackberry troubles and ravages which have spread too rapidly. At the experimental station at Harrogate, New Zealand, and back, have been placed the eggs of European insects and caterpillars are to determine elimination tests to determine which bugs have the most voracious appetite for weeds and do not include vegetables and fruits in their diet.

When the insect "check troops" are placed they will be rushed to New Zealand and turned loose against the farmers' enemies.

Wintering Steers Lost In Pens

To determine the relative merits of housing steers for winter feeding the Ontario experimenters in the pens in the test has been conducted during the last three years at the Lennoxville, Quebec, Experimental Station. The results of the test show quite conclusively that larger gains can be obtained at a cheaper cost by feeding the steers in the pens than in the open, when the cost of labor and equipment is taken into consideration there is a marked advantage in wintering steers in this way.

Seckeye Salmon In B.C. Scarce

"I saw and heard of less Seckeye in the Seckeye area of the Fraser River above Hell's Gate Canyon this year than in any of the preceding 25 years in which I have hunted for them," says John P. Ibbotson, assistant commissioner of fisheries for the province, said in a statement issued in the Fraser River basin above Hell's Gate. "There can be no commercial return for years hence from the Seckeye salmon run in the Fraser in August and September this year," he said.

An Asset Of Importance

Government Geologist Of New South Wales Believes Western Coal Output Will Increase

As the centre of Canadian population moves westward, the demands upon the coal fields of Alberta and Saskatchewan will increase," observed Dr. E. C. Andrews, government geologist of New South Wales, while in Saskatchewan recently as one of a party of 225 of the Empire Mining and Metallurgical Congress.

Impressed with the great success of the congress, Dr. Andrews said he was pleased to see the tremendous coal industry and the vast resources within the Empire, of which about one-seventh of the world's known supply was in the Alberta field.

"The coal fields of Alberta have immense possibilities," he said, with the observation that the difficulties of transport, and the great distance to the eastern centres of population were delaying the full development of the pits.

All practical miners in the party had been much interested by the methods used to mine coal from the bituminous fields.

The rock tunnel isolated panel system with 200 feet between each panel is a great protection against fire, he said. To the ordinary citizen that system of mining would mean that the saving method preserved thousands of tons of coal and protect miners from danger.

The methods of mining in the Cadomin area were similar to those of at least one mine in New South Wales, he said.

The large slopes at Sullivan, the concentrating plant and smelter at Trail, B.C., and the zinc plants and mining industries had attracted much interest to him, said Dr. Edwards.

"The Dominion has developed remarkably in the 20 years since I was here last. The growth of the West has been marvellous. The school systems, the technical facilities and the institutions of higher education are all a monument to the men and women who are building Canada.

Of course, you realize that we are anxious to see trade with Canada developed. We are more than anxious to see trade developed between the various parts of the Empire."

The Wise Business Man

Does Not Give Up Unless He Has Something Else To Interest Him

Business men will read with amusement and advantage the story of Edmund P. Hatch, the broker, who sold his seat on the New York Stock Exchange for \$194,000, intending to retire, and less than three months later bought it back at an added cost of \$24,000.

He was probably very busy. Many a business man goes away for a day when he gives up his business and finds he has nothing in the world to really interest him. It is interest and enthusiasm in life that keep a man busy and even keep us alive after middle-age.

To be sure, before you retire, that you have accumulated outside interests that can keep up your pen and enthusiasm after you lay your business down.

Apples In Canada

Apples are Canada's leading commercial product in fruit. Since 1885 when seed was imported from Eliza, on the Baltic Sea, continuous efforts have been made to originate new and better varieties of apples for Canada. In a recent report of the Horticultural Division of the Dominion Experimental Farms descriptions of eighteen new varieties named during 1921 are published.

A Neat Retort

She had very red hair. A rude boy entered the car, glanced at her one or two times, and then edged away to the far corner. "Excuse me, miss," he said grinning. I must get too close to you, or I might get burned," he said.

That she was a bright girl and quite equal to the occasion. "Don't worry," she replied, "your's much too green to burn."

Nesadade Mountain

Nesadade Mountain is the international boundary between British Columbia and Alaska. It is 8,165 feet high. It was named after Count Charles de Nesadade, Minister of Foreign Affairs in the Russian Government and plenipotentiary in the negotiations between Russia and the United States regarding the Alaska Boundary.—Geographic Board of Canada.

Only an expert shopper can visit recreation stores in one afternoon and escape without spending a cent.

W. N. C. 1701

Utilizing Power From Sleeping Volcanoes

Italy Now Using Steam Energy For Industrial Purposes

To engineers it has long seemed a great waste that the tremendous energy of volcanoes should not be harnessed and put to work.

Already means have been found of harnessing steam from geothermal sources can be utilized for industrial purposes, says the *Dashen* Independent. In Italy, electricity derived from volcanic heat is sent over wires to Florence, Leghorn, Piombino, and other cities and towns for light and power.

In Bolivia the government has granted a concession for the use of steam from Mount Tiro, in the Sud Lige district, near the Chiling range. The volcano is to be made to drive turbine engines which are expected to generate all the Bolivian railroads.

The wells are bored usually to a depth of about four hundred feet, and are lined with iron tubes eight to sixteen inches in diameter. At the mouths of the puffing holes, both natural and artificial, the pressure of steam remains always the same, year after year, the subterranean heat supply being apparently inexhaustible. Nowadays the water vapor is expanded in huge leaf-like pans, beneath which live steam fresh from the depths is condensed through coils of pipe.

Boring for steam has been going on for more than a year near the crater of Kilisea, on the island of Ibo, in the Philippines. The drills are extremely hard, so that the drills have not penetrated very far. It is said that the scheme in that locality is being abandoned. But the Hawaiian Government is working on a plan, seemingly practicable, for harnessing the power of the volcano from the Kilauea crater. It is proposed to extend a trolley across the crater, carrying an endless chain of buckets, which will scoop up the liquid lava, carry it to the rim of the fiery hole, and pour it into molds.

Papers One Cannot Buy

Scotland Yard Has Publication Only Seen By Officials

If your newspaper agent boasts that he can obtain any paper you desire, order a copy of "Blue and Gray," and you will have to admit defeat. This paper is published by Scotland Yard, and although it is the daily connecting link between Scotland Yard and every town and district in the Kingdom, only police officers and high officials ever see it.

It contains "private and confidential" information concerning men and women who are wanted but have vanished from their familiar haunts. It lists names of persons, and many precious times that notorious crooks would give much to know it.

"Blue and Gray" by no means the only daily newspaper that the general public never sees. The British railway companies issue a daily journal, for the benefit of interested members of their staffs. This is not a crime record, but it does help the chief of stock, for it records articles the railway have on hand. One issue of this paper reported that the railways had their greatest collection of birds, beetles, tadpoles, a collection of dogs, serpents, and ancient human remains!

Have Curative Qualities

Almost All Fruits and Vegetables Make Excellent Remedies

Most vegetables and fruits have curative qualities. Spinach has a direct effect upon the kidneys, and onions, garlic, leeks and shallots possess medicinal qualities which have a marked effect upon the circulatory system.

A raw onion eaten before going to bed is an excellent remedy for insomnia, whilst soup made from onions has a soothing and restful effect upon weak digestive organs.

The lettuce and the cucumber cool the system, and are excellent for indigestion and colic, and celery has such an admirable effect upon the nervous system that it has been known to cure neurasthenia and is of great use in rheumatic cases.

"Tomatoes are good for the liver. Peas, carrots, cherries and pears are cooling, and purifying. Eaten first thing in the morning, an orange will give dyspepsia.

Dominion's Nickel Production

The nickel production of Canada constitutes 85 per cent of the output. This is derived from the Sudbury district, Ontario, supplemented to a slight extent by the nickel recovered as a by-product from the treatment of the silver-cobalt-nickel ore of the Cobalt area.

Catgut, contrary to its name, does not come from cats, but is prepared from the intestines of sheep.

Increase In Livestock

Number Of Horses, Cattle, and Sheep Show Increases In Prairie Provinces

While Manitoba had 125,000 horses in 1920, as against 64,000 in 1911, Saskatchewan in the period has increased her number from 5,510 to 9,210, and Alberta from 4,720 to 9,210. This would indicate that the tractor and other mechanical power is by no means ousting the horse in farm operation. In the period cattle per farm have increased in Manitoba from 9.88 to 11.04; in Saskatchewan from 4.87 to 5.42; and in Alberta from 12.21 to 15.41. Manitoba, which had 86 sheep per farm in 1911, had in 1920, 212; Saskatchewan increased its figure from 1.29 per farm to 1.37; and Alberta from 2.21 to 4.17. This latter is due to the addition of large range herds as well as the more general adoption of sheep on the small farm. In the 15 years Manitoba has increased its ewes per farm from 1.42 to 2.71; Saskatchewan from 2.01 to 2.67; and Alberta from 2.52 to 3.69.

Demand For Farms

Sale Of Five Farms Is Reported By Development Company

Indicating an increasing demand for prairie lands by immigrant settlers, the Canada Colonization Association, a subsidiary of the Department of Colonization and Development of the Canadian Pacific Railway, has just completed the sale of five farms aggregating 2,040 acres. Locations and prices follow: 480 acres at Osgo, Sask., \$19,000; 320 acres at McCawley, Sask., \$13,000; 480 acres at Hawarden, Sask., \$25,000; 560 acres at Provost, Alberta, \$28,000.

Forest Tree Seeds

The Forest Service of Canada has four plants for the extraction of forest tree seeds from the cones or envelopes. These are located at Indian Head and Prince Albert, Saskatchewan; Vancouver, British Columbia; and Rocky Mountain House, Alberta. The output of these plants in the fiscal year 1920 was about 2,500 pounds of cleaned seed. A large proportion of the seed was shipped to Great Britain to be used by the Forestry Commission in its reforestation work.

A man's religion never dies so long as he uses the golden rule in measuring his actions.

Pleads For Unity

Needed Above Everything Else Says Sir Arthur Currie

Just as unity was necessary during the war so it was needed above everything else in times of peace, declared Sir Arthur Currie, former commander of the Canadian corps in France, at a dinner in Montreal of the "Royal Canadian Legion." Canada, Sir Arthur continued, has three great lessons to teach the world. First, it was the only country of its size that had won a political victory without a war or a revolution of any kind; the only country in the world that had not had to fight a battle for its independence. Second, it contained two great races with centuries of war behind them, who lived in peace and harmony and with the one ideal—to make Canada a happy and prosperous land for a happy and prosperous people. Third, it had lived for 100 years at peace with one of the greatest nations of the world. The Dominion, he believed, should play a great part in the development of peace.

The Value Of Courtesy

Nothing Else As Good For Business Or Making Friends

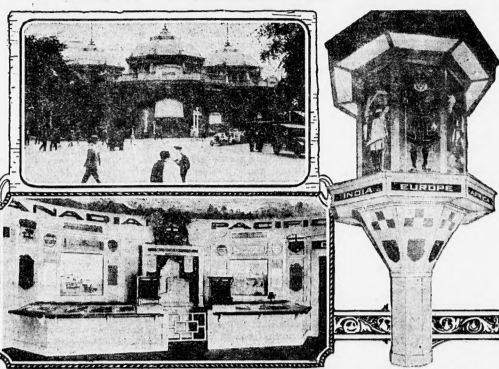

Courtesy is something, but it is the greatest selling proposition in the world. Courtesy recalls the customer and invites a sale; discourtesy drives away those you have and keeps away others. Wisdom is always courteous; discourtesy is the earmark of stupidity.

Discourtesy is no mark of superiority. The real aristocrat is the most courteous to those whom fate has placed in lower walks of life than those he reads, thus he has a paradox which is a great truth—a real democrat is the only real aristocrat. We all like money, but there is not one of us that does not know there are things more precious than money.

One self-respect is one of them. The discourteous man insults the self-respect of others and makes enemies of them while he is making a fool of himself.

What could exasperate a man more than hitting a pedestrian with his car and not getting the fender all bent?

Handsome Canadian Pacific Exhibits

(1) The Railway Building at the Toronto Exhibition. (2) A portion of the Canadian Pacific exhibit.

Throwing the spotlight on all its renowned activities, the Canadian Pacific Railway has again achieved success in its exhibit this year at the annual exhibition at Toronto. It is a busy spot for the visitor; for both the artist and the seeker after instruction and education find in this display a wealth of beauty and learning. Running from the ceiling down a depth of about four feet was a circular panorama of the Dominion stretching from the Atlantic to the Pacific Coast. This frieze was designed by James Crockett of Montreal and executed by four other Canadian artists. In lovely colours it gave an accurate picture of the country through which the journey is made. At the base of this panorama the famous all-time miniature Trans-Canada made its run.

Spread out as on a stage was a large model of the St. Lawrence River with the Atlantic Express steamships and smaller vessels entering and leaving the docks. In the foreground were prosperous-looking farms across the river to the city of Quebec with its winding streets and the towering Chateau Frontenac formed an absorbing picture.

To link the East with the West there was produced a working model of showing the Banff Springs Hotel in its fairy-like surroundings. Here were seen the Canadian Rockies and the Bow River Valley in holiday mood. This beautiful castle of comfort in the heart of the mountains promotes the urge to see more of the country we live in. Tiny automobiles tour the winding paths, and riders start off with their pack horses for snow-capped peaks, and the story Indian with his hawk seat outside their tepees helped to make the setting realistic.

The company's art achievement in the Canadian Pacific Express was a model of the original Express building in Winnipeg dated 1882.

In addition there was a wonderful collection of revolving transparencies in natural colors, also rows of these were placed waist high around the exhibit, and the transparencies clearly showed its individuality in the center was a pillar around which are life-sized figures of native of foreign countries in characteristic costumes.

Not Becoming Lost Art

Still Plenty Of Work To Keep Blacksmiths Busy

If the click of the hammer under the chestnut tree ever disappears from the land, the primary cause will be the vanishing of the chestnut tree and not of the village smithy. The smith a mighty man still is to be desired. Four million automobiles, delegates representing 70,000 master horsehoes and blacksmiths recently held a convention in Jersey City. In New York City alone there are 65,000 anvils to keep hammer and nail from becoming a lost art. On the farms in the census year 1920, there were 15,747,000 horses. This was a decline of only 65,000 from the census of 1910 but the decrease in value is \$200,000,000. A fall of 15 per cent in value for the average farm horse would be explained by the automobile, which has displaced the higher grade animal that the farmer relied upon for driving into town, and the farmer's son for the social buggy ride.

Nevertheless, it is admitted by a spokesman for the master horsehoes that their survival is conditioned upon compromise. The village blacksmith has taken an automobile requiring a sideline. It is not stated how this compromise with the motor will affect the village smithy. The census figures suggest that it must bulk large. In 1910 there were 235,000 blacksmiths in the country. Ten years later there were 155,000. The decline in the number of women blacksmiths was catastrophic. In 1910 there were 10,000. By this time the village blacksmith must be only a memory.—New York World.

Elk For British Columbia

The Department of the Interior at Ottawa has granted the application of the province of British Columbia for elk to be used in reforesting areas between the Okanagan and Kettle Valleys. Twenty-five animals from the herd in Buffalo National Park at Wainwright, Alberta, were shipped to Coquitlam, B.C., and released. The Wainwright herd numbers approximately 400 animals.

In the "Polytechnic Institute of Zurich" Switzerland, a clock which does not need to be wound, its running power is provided by a mechanism set in motion each time there is a change in temperature of two degrees.

Crate Feeding Of Poultry

Instructions As To Best Methods To Be Used

No poultry intended for eating should be raised without being fed. The easiest way to do this is by crate feeding, and detailed instructions for making the crates are given in a bulletin on Preparing Poultry Produce for Market, available at the Publications Branch of the Department of Agriculture at Ottawa.

The grains most commonly used in crate feeding are corn, oats, barley and buckwheat, or some of their by-products. Whatever is used should be finely ground. Whole grain should never be given. Corn produces a yolky, low quality egg. Oats and buckwheat are of equal parts of corn, oats and buckwheat.

In crate feeding the use of sour milk is indispensable, where high quality is desired. It should not be only fed of feed mixed with milk, but can take more of it, and can stand heavy feeding for a longer period than when fed on dry feed. This makes a rather thin proportion. The birds are fed all they will eat twice a day, and any food that is fed should be removed immediately so as to keep the appetite keen. It is customary to mix a mash feed ahead of so that for a few days before the birds are fed, Cockerels especially should be crate fed before marketing. It will also pay to feed the pullets and hens the same way, as they will lay better eggs. Two weeks may be sufficient time to crate females, but cockerels may be fed for three or even four weeks to advantage.

A Lasting Friendship

Difference Of Opinion Does Not Affect Canada-U.S. Relations

It was a happy coincidence that took the Foreign Office of the United Kingdom to Mr. Baldwin to America just after the failure at Geneva and brought about the meeting on the Peace Bridge with the Vice-President of the United States. It is a poor friendship between other nations or individuals is in Canada and the United States, opinion; rather it is the sign of true friendship when it can reconcile care with partially. Europe took a certain pleasure in the spectacle of England and the United States, arguing with each other in Geneva, but the differences are not so great as to divide Europe, and if neighboring States in Europe nurtured their relations with anything like the success of Canada and the United States, there would be no problem of disarmament to solve.—London Saturday Review.

Not All Imagination

In Last Century Hans Andersen Wrote Of Atlantic Flight

Hans Andersen showed a remarkable prescience of the flight of the Atlantic. In one of his stories, "The Years to Come," written in the sixties of last century, the gifted writer in fairy tales has the following passage:

"The airship comes. It is crowded with passengers, for the journey is quicker than by sea. The submarine, electric-magnetic wire has already telegraphed the number of the passengers. Already Europe is in sight. It is the Irish Coast that lies beneath them; but the passengers sleep on; they do not wish to be waked until they are exactly over Europe."

Needed Scientific Name

"Doctor, if there is anything the matter with me, don't frighten me half to death by giving it a long scientific name. Just tell me what it is in fairly plain English. Well, sir, to be frank you are lazy."

"Thank you, doctor. Now tell me the scientific name of it. I've not to report to the museum."

Canadian Ice Cream For Bermudas

As a latest development of the Canadian West Indies trade, ice cream is now being shipped from Halifax to Bermuda in a special block.

Kept solid throughout the journey. "I see this medicine is good for man or beast."

"Yes," said the druggist. "Give me a bottle. I believe that the combination to help my husband."

Never bet on a sure thing—unless you can afford to lose.

Keep your promises and discharge your obligations.

"Do you think so?" "Yes. I have tasted it!"—Le Moustique, Charles

THE EMPRESS EXPRESS

Published in the interests of Empire and District Subscription price \$2.00 per year to any part of Canada or Great Britain \$5.00 to the United States R. S. Sexton Proprietor A. Harkin

Thursday, Oct. 27, 1927

W. C. Z. 1, of Calgary, was a visitor in town, on Saturday.

Mrs. D. Lash, was visiting in Medicine Hat, this week.

Sub. Setran left for Calgary on Saturday, returning on Monday with a new Essex Six.

Mrs. D. McEachern returned from a visit to Calgary, on Friday.

Mrs. McCann and children, of Leader, were visitors to town, Wednesday.

With the advent of threshing well under way the ploughing pillars of anything from toothbrushes to pianos are making their calls in the town and district.

C. Andres, of Hilda, is assisting on the staff of the Express Lumber Yards.

The regular meeting of the I.O.D.E. will be held on Tuesday afternoon, November 1st, at 3.30 o'clock at the home of Mrs. Reed.

We are agents for all magazines and newspapers. Give your orders to the "Empress Express."

Adames G. S. Tucker, D. J. Dine, J. McNeill and Mr. W. Suthers made a trip to Medicine Hat over the week end.

Mr. and Mrs. W. Evans, were visitors at the home of Mr. and Mrs. U. R. Moore, on Monday. Mr. Evans is a representative of the Cammore Coal Co.

Mr. and Mrs. V. Crawford of Edmonton, Alta., were the guests of the latter's cousin, Mrs. F. Sibley, this week.

Mrs. Tarr's sister and brother-in-law, Mr. and Mrs. Edwards, of Shaunavon, were the guests of the former's mother, Mrs. S. Rendel, this week end.

Ray Shepler, sub-contractor for the new joint railway, has now arrived with part of his equipment and has commenced grading about a mile west of Rosedale—Maid, Drumheller.

Commissioner Bryant of the Alberta Provincial Police, and Geo. R. Henson, Dep. Attorney General, of Edmonton, were in town on Wednesday last week on an inspection trip.

Weather throughout the past week has been very good for threshing operations and the rigs have been pouring out a steady stream of grain. Almost without exception the yields have been heavy. Southwest of town a lot of crop has been cleaned up and one or two outliers are leaving for the north side of the river where the threshing is not so far advanced.

Halloween Club Party and Dance by I.O.D.E. Oct. 31, lunch and dinner to remember the date.

The teen age boys and girls are now organized into a Ranger camp, Taxis Square and Junior and Senior C.G.I.T. under the leadership of Mr. Maxwell, Mr. Bierwagon, Miss Mildred Arthur and Miss Opal Boyd. The "Explorers" young boys are also organized under the leadership of Mrs. Frost.

Swift Current Sun: The Indians and other half breeds who have lived close to nature are credited with being close observers and are usually weather wise; therefore the observations of one of the oldest half-breeds of the district is very interesting when he states that his opinion is that the country will have a long and open Fall. There are very late hatches of wild birds and wild animals mated late this season. According to actions and reactions, and the law of averages the half-breed ought to be right, at

Here and There

Air mail service between Winnipeg and Fargo, North Dakota, has been inaugurated and the first mail for Winnipeg from the United States arrived recently.

The points arrived along the Dominion Atlantic Railway line is more than 100 per cent and 40 per cent, and increase is looked for. There will likely be 1750 barrels available for export, as compared with 100,000 last year.

British Columbia's farms produce of 1926-27 last year, breaking all records and gaining \$8,200,000 more the previous year, according to the final figures of the Provincial Statistician, G. H. Stewart. Lumbering leads with agriculture second.

A new world record is set—200 white Lagers baby chicks arrived from the University of British Columbia at Ottawa through the Canadian Pacific Express Company, safe, sound and hungry, all at once. None had food or water on their trip and none journey and none died or suffered.

A Barred Plymouth Rock, owned by the University of Saskatchewan, has established a new record for the three Prairie Provinces, laying her 30th egg in the 30th year of which there is still a month to go. The world's record for transposed production is held by No. 6, an Augusta, D.C. pullet, which laid 351 eggs in 351 days.

any rate he brings cheerful news at a time when many are wondering what is going to happen

Rural Municipality of Mantario No. 262

Notice is hereby given under the provisions of the Arrears of Taxes Act, that unless the arrears of taxes and costs are sooner paid, the treasurer of the Rural Municipality of Mantario No. 262 will proceed to sell the undermentioned lands at the Municipal Office, NW 5, twp. 27, rge. 27, w. of 3rd, EYRE on Thursday, the 1st day of December at the hour of 2 o'clock in the afternoon (mountain standard time).

Note.—The sum of 50 cents for costs is included in the amount shown against each parcel in this list.
